

What Is Claimed Is:

1. A high chair clean seat for use as a seat  
cover on a high chair, said high chair clean seat  
5 comprising:

a central portion having a longitudinal axis and a  
lateral axis, said central portion configured to cover  
a center seating portion of the high chair; and

a continuous plication surrounding said central  
10 portion, said continuous plication having a front  
portion and a back portion extending from said central  
portion in opposite directions away from one another  
and parallel to said longitudinal axis, said continuous  
plication having a first side portion and a second side  
15 portion extending from said central portion in opposite  
directions away from one another and in a direction  
parallel to said lateral axis, and said continuous  
plication configured to cover an entire seating area  
surrounding the center seating portion of the high  
20 chair.

2. A high chair clean seat for use as a seat  
cover on a high chair according to claim 1 wherein the  
entire seating area surrounding the center portion of  
the high chair comprises a front seating portion, a  
5 back seating portion, side seating portions, and an  
upper portion of each high chair leg.

3. A high chair clean seat for use as a seat  
cover on a high chair according to claim 1 wherein said  
10 continuous plication is folded to form an inner surface  
and an outer surface in opposition to one another, and  
further wherein said continuous plication comprises  
securing fasteners disposed on said inner surface and  
said outer surface so as to further secure said  
15 continuous sleeve to the high chair.

4. A high chair clean seat for use as a seat  
cover on a high chair according to claim 3 wherein said  
securing fasteners comprise Velcro® hook and loop  
20 closures.

5. A high chair clean seat for use as a seat cover on a high chair according to claim 3 further comprising a pair of horizontal adjustment flaps extending from a portion of said continuous plication, and further comprising adjustment fasteners disposed on each of said pair of horizontal adjustment flaps and on a portion of said outer surface of said continuous plication adjacent to said horizontal adjustment flaps.

6. A high chair clean seat for use as a seat cover on a high chair according to claim 5 wherein said adjustment fasteners comprise Velcro® hook and loop closures.

7. A high chair clean seat for use as a seat cover on a high chair according to claim 1 further comprising a safety belt in attachment to said central portion so as to secure a child to said high chair clean seat.

8. A high chair clean seat for use as a seat cover on a high chair according to claim 7 wherein said

safety belt is used instead of a belt provided in the high chair.

5           9. A high chair clean seat for use as a seat  
cover on a high chair according to claim 1 wherein said  
central portion and said continuous plication comprise  
a thin sheet of material.

10           10. A high chair clean seat for use as a seat  
cover on a high chair according to claim 9 wherein said  
thin sheet of flexible material comprises cotton  
quilted material.

15           11. A high chair clean seat for use as a seat  
cover on a high chair according to claim 9 wherein said  
thin sheet of flexible material comprises a polyester  
and cotton blend material.

20           12. A high chair clean seat for use as a seat  
cover on a high chair according to claim 9 wherein said  
thin sheet of flexible material comprises an outer

portion of cotton material and an inner portion of polyester material.

5        13. A high chair clean seat for use as a seat  
cover on a high chair according to claim 9 wherein said  
thin sheet of flexible material comprises a plastic  
material.

10       14. A high chair clean seat for use as a seat  
cover on a high chair according to claim 9 wherein said  
thin sheet of flexible material comprises a non-woven  
fabric.

15       15. A high chair clean seat for use as a seat  
cover on a high chair according to claim 9 wherein said  
thin sheet of flexible material comprises a recycled  
material.

20       16. A high chair clean seat for use as a seat  
cover on a high chair according to claim 9 wherein said  
thin sheet of flexible material comprises a disposable  
material.

17. A high chair clean seat for use as a seat  
cover on a high chair according to claim 1 wherein said  
central portion and said continuous plication are  
5 integral.

18. A high chair clean seat for use as a seat  
cover on a high chair according to claim 1 further  
comprising piping material attached to said central  
10 portion and said continuous plication so as to retain a  
formed shape.

19. A high chair clean seat for use as a seat  
cover on a high chair according to claim 1 wherein said  
15 front portion of said continuous plication defines a  
pair of leg openings therethrough.

20. A high chair clean seat for use as a seat  
cover on a high chair according to claim 1 wherein said  
20 continuous plication comprises an outer perimeter  
forming a generally rectangular shape so as to fit  
directly over an outer perimeter of the high chair.

21. A high chair clean seat for use as a seat  
cover on a high chair according to claim 20 wherein  
said generally rectangular shape is square.

22. A method for covering an entire seating area  
of a high chair, the method comprising:

providing a high chair clean seat for use as a  
seat cover on the high chair, said high chair clean  
seat comprising:

a central portion having a longitudinal axis  
and a lateral axis, said central portion configured to  
cover a center seating portion of the high chair; and

a continuous plication surrounding said  
central portion, said continuous plication having a  
front portion and a back portion extending from said  
central portion in opposite directions away from one  
another and parallel to said longitudinal axis, said  
continuous plication having a first side portion and a  
second side portion extending from said central portion  
in opposite directions away from one another and in a  
direction parallel to said lateral axis, and said

continuous plication configured to cover the entire seating area surrounding the center seating portion of the high chair; and

5 positioning said high chair clean seat on the entire seating area of the high chair by placing said central portion, said front portion of said continuous plication, said back portion of said continuous plication, said first side portion of said continuous plication, and said second side portion of said  
10 continuous plication over the center seating portion of the high chair, a front portion of the high chair, a back portion of the high chair, a first side portion of the high chair, and a second side portion of the high chair, respectively, so as to cover the entire seating  
15 area of the high chair with said high chair clean seat.

23. A method for covering an entire seating area of a high chair according to claim 22 wherein the entire seating area further comprises an upper portion  
20 of each high chair leg, and wherein said continuous plication covers said upper portion of each high chair leg.
